### DETAILED ACTION

1. The abstract of the disclosure is objected to because it is not limited to a single paragraph on a separate sheet. Correction is required. See MPEP § 608.01(b).

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 6122803.

The cited prior art discloses a resin containing rare earth element with absorption of radiation capabilities, and comprises methacrylate salts. The composition further comprise unsaturated carboxylic acid having C<sub>1</sub>-C<sub>20</sub>. The composition has selective absorption of radiation rays and electromagnetic waves caused by rare earth elements. It can be used as an optical filter, lenses, etc. It is the Examiner's position that the prior art disclosures have features as claimed, including the limitations of the dependent claims.

3. Other references listed on PTO-1449 have been made part of the record.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAMUEL A. ACQUAH whose telephone number is 703-308-2436. The examiner can normally be reached on M-TH, FRIDAYS OFF.
